FINISHES

.....Where spaces
imitate Art!

INTRODUCTION

Established in **2008**, Matrix maintains its USP by offering the most suitable product solution. The right interior finishes, that complies to the technical specifications & follow the aesthetic concept.

A conquest for fresh & innovative designs results in constant development of finishing products.

Matrix decided to focus on product centric approach rather than the conventional brand centric. Our approach towards the projects is to work around the requirements of client rather than making them to work around our product.

We ensure that our clients are updated with the latest technology & innovations in the field of finishing products.

FINISHES

- Porcelain Tiles
- Handmade Tiles
- Agglomerate Marbles
- Printed Mosaic
- Environ Cladding Panels
- Glow Panels
- Lights

PORCELAIN TILES

Porcelain Tiles - Porcelain is the Most Popular Flooring. Product with technical superiority over all other floorings. Matrix carries the commercial range of polish porcelain tiles to most exclusive hand crafted & crystalline series.

Due to versatility of porcelain, we are constantly working on designs & textures that will inspire designers. Capacity of production can go up to 150,000 sq meters per day. This can cater to requirements of any scale of project. Our factories have the capability to produce size up to 1.2 x 1.8 m.

HANDMADE TILES

- Patterns & designs can be customized even for small quantities.
- Each tile is different from other.
- Natural Art on the wall.
- Endless possibilities of colors.
- 100% recyclable product
- No VOC emission

Agglomerate Marble

Virtually any colours or design is possible with the invention of agglomerate marble.

- Matrix can provide a range of colors.
- Designs Slab size in agglomerate marble can go up to 1.2 x 3.0m.

AGGLOMERATE MARBLE

Smart wall

- For the first time, we have a wall finish that works as Wifi transmitter.
- Printed Mosaic allows unlimited possibilities to design.
- Endorsed & used by top Architects in the world to quench the innovative thirst.

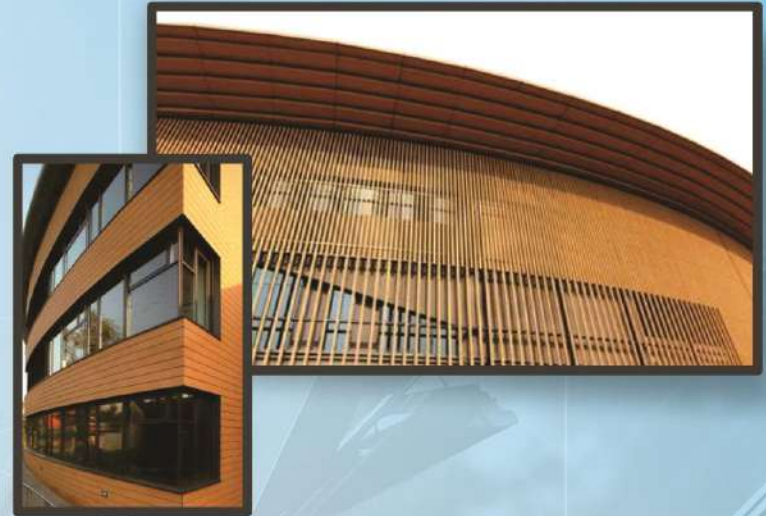

An **underwater experience** in kids spa at Palm Jumeirah is truly mesmerizing. Light weight system allows a **turnaround time** of 2-3 weeks from order to delivery. Appropriate as an **Exterior finish**. Cost Effective solution.

CLADDING PANELS

ENVIRON CLADDING PANELS

Compared with the traditional building material available, EPC being a new green product, brings about a cultural change in its integration into the modern design area with its energy saving features which have been popularised in this modern architectural era. The usage of ECP as a cladding with low-carbon energy has become a trend, or an architectural monument with its aesthetic. ECP has created this and vividly shown to the world.

- Fire Resistant.
- 100% green product.
- High insulation properties.

GLOW PANELS

GLOW PANELS

The product design to be joining seamlessly so that it will be easier for cleaning and maintaining it is the best choice to replace natural marbles.

With excellent impact resistance.

- Fabrication property.
- Eco friendly.
- Recyclable.

LIGHTS

Architectural & Technical Lights

Matrix represents a wide range of international brands of light fitting. These brands are carefully selected to complete the requirement of commercial projects.

Light should not interpret **architecture**; it must transform it.

Display Lights

We have a **dedicated design** team to provide a **complete solution** for any project requirement.

- Enhance and support the work of the whole ensemble.
- Creates an atmosphere that helps customers relax.

Decorative Lights

Less is more when it comes to the lighting design.

We have a dedicated design team to provide a complete solution for any project requirement.

GDS

- Profiles
- Backlit Solutions
- Power Supply
- LED Linear Profiles
- Acrylics
- Industrial Solutions

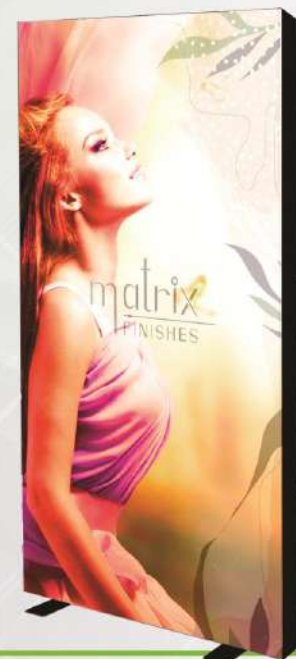

Aluminium Profiles: Being a manufacturer of Aluminium profiles, Matrix Finishes takes great care in developing a high-quality range of profiles from size to usability with the support of its RND department. Our 14 years of market leadership is backed by the superior profiles, ease of installation, intersection with other surfaces and multiple usability, among others, making us desirable among competition.

Key Features:

- Length 6.05 meters optimize wastage.
- Designed for bigger Light Boxes.
- Heat sink to optimize the life of Led & Power Supplies.
- All profiles size 60mm & above allows to be used as Double Side Display.
- Accessories designed for various angular shapes.

After getting an exceptional foothold in the UAE, we look forward to partnering with companies across globe who believe in quality and innovation in business. Immense opportunity in profile business comes with great profitability.

BACKLIT SOLUTIONS

BACKLIT SOLUTION

Backlit Solution: When it comes to backlit solutions each sign/display requires a particular Lighting. Matrix has developed its product range that can provide solutions for most of the challenges posed by the industry. Matrix products are approved & have been widely used in Expo 2020, Qatar Exhibitions Centre and many such prestigious projects.

Key Features:

- High quality COB – Osram/ Samsung/ Cree.
- Range of Solutions, minimum depth of 2.5 cm to max width of 3 m
- Direct Led modules. Modules work on 220 V & do not require separate power supply.

We invite you to explore our product range where you'll find solutions to any challenges regarding backlit.

POWER SUPPLY

POWER SUPPLY

Power Supply: A power supply for LED lights is essential to convert standard electrical voltage into the low-voltage, direct current (DC) needed to operate LEDs efficiently. These power supplies, often referred to as LED drivers, ensure stable and flicker-free illumination while extending the lifespan of LED bulbs. They play a crucial role in achieving energy-efficient and long-lasting lighting solutions.

Key Features:

- Voltage conversion and regulation.
- Output stability and reliability.
- Efficiency for energy savings.
- Protection features (overload, overvoltage, etc.).
- Noise and ripple control.
- Modular or fixed designs.
- Certifications for safety and efficiency.
- Cooling and fan control.
- Remote monitoring (advanced models).

LED linear Profiles: LED linear profiles are versatile lighting fixtures consisting of aluminum or plastic extrusions housing energy-efficient LED strips or modules. They offer customizable designs, even light distribution, and are suitable for a wide range of applications, from architectural lighting in commercial spaces to ambient lighting in residential settings. Their energy efficiency, longevity, and adaptability make them a popular choice for modern lighting solutions.

Key Features:

- Premium quality extruded aluminum
- Compatible with 8mm to 40mm led strips
- Premium quality pc light diffusers
- Excellent heat sink
- Suspended model
- Trimless design
- No heat transmission on product when installed on shelves
- Clear gap free installation in wooden shelves

Acrylics : Cast acrylic is manufactured by a process whereby MMA(Methyl Methacrylate monomer) liquid is pumped into a mould made from two sheets of glass. The mould/monomer is then submerged in warm water and the process of polymerization takes place. The result is a sheet of rigid PMMA (polymethyl methacrylate) or what is generically called Acrylic. Various trade names are applied to this sheet- in Europe it's called "Perspex", in the USA it's often referred to as "Plexi or Plexiglas and many more.

- **Key Features:**

- 100% virgin
- 90% + light transmitted in transparent sheet
- More scratch resistant
- Preferred choice for laser engraving, produces a frosted look with a smooth polished edge that won't bend or chip during cutting
- More forgiveness when cut and can be cut into any shape
- Better chemical resistance

INDUSTRIAL SOLUTIONS

Industrial Solutions: Double-sided tapes and adhesives are invaluable industrial solutions for a wide array of applications. They provide strong, reliable bonding, ideal for mounting signs, attaching automotive trim, assembling electronics, and even joining structural components. Their versatility, ease of use, and ability to create seamless connections make them essential in modern industrial processes, enhancing efficiency and product reliability.

- **Key Features:**

AMONG THE TOP 3 BRANDS THAT OFFER 18 MONTHS SHELF LIFE.

- Versatile bonding for various applications.
- Strong and reliable attachment.
- Ideal for mounting, assembly, and structural bonding.
- Enhances efficiency and product reliability.
- Wide range of industries and applications.
- Easy to use and create seamless connections.
- Provides a clean, neat appearance.
- Reduces the need for mechanical fasteners.
- Offers both permanent and removable options.
- Contributes to improved manufacturing processes.
